## ENESTÅENDE MULIGHED Oplev Frank Spear i Danmark til september 2018

Dawson, Pankey, Kois og Spear – fire navne som de fleste danske tandlæger har stiftet bekendtskab med på et tidspunkt i deres karriere. For samtlige fire gælder det, at de alle er exceptionelt dygtige til at formidle viden inden for deres respektive fagområder.

Flere og flere danske tandlæger har fået øjnene op for, hvor meget fagligt udbytte der er at hente ved at deltage i kurser, som disse fire mentorer afholder.

*Efter at have deltaget i disse kurser gennem mere end 20 år, vil jeg vove den påstand, at min faglige hverdag er blevet bedre funderet og mere forudsigelig. Specielt indenfor bidfunktion har det haft en enorm betydning for, hvilken tilgang jeg har til mine patienter!*

*Det var en øjenåbner for mig, da jeg tog Spears kursus i USA. Spears evne til at kombinere teori og praksis er enestående, og han formår at overføre, hvordan du som tandlæge håndterer det klinisk. Kurset har uden sammenligning været det kursus, der har givet mig størst udbytte rent klinisk om emnet: BIDFUNKTION. Frank Spears kursus i Danmark, vil med garanti udvide danske tandlægers kliniske viden omkring bidfunktion.*

*Derfor kan jeg varmt anbefale at deltage i dette kursus. Udover at være moderator på kurset, vil jeg uden tvivl også tage mange nyttige noter, fordi jeg af erfaring ved, at Frank Spear udvikler sine kurser kontinuerligt.*

*Jeg glæder mig til at deltage i "Demystifying Occlusion" version 2018!*

**Tandlæge Jan Frydensberg Thomsen**

## Course Objectives

Gain confidence and remove the confusion and fear surrounding occlusion in your practice, allowing you to treat patients more predictably and with less anxiety from a single second molar crown, to full arch restorations, or even patients with symptoms of facial pain.

## Participants Will Learn

- Why occlusion can seem so complicated, but how predictable it is in most patients, and how to recognize the high-risk patient in advance
- To gain confidence in understanding the TMJ, and how easy it is to evaluate them as a potential problem for your patients, including possible solutions if they are a problem, and how to have a conversation with your patients about the TMJ
- To efficiently evaluate your patients' muscles, and predict whether any therapy is necessary, which treatment, and how to discuss it with your patient
- What a complete joint and muscle exam looks like, and how efficiently it can be done in any practice (with multiple examples shown on video)
- How to become confident in choosing among all the different occlusal appliances available, including a specific flow chart of the appliance choices based upon your patients' symptoms
- and history, with an emphasis on how to discuss appliance therapy and fees with your patients
- How and when to utilize mounted models in your occlusal treatment-planning process, including what facebows do, how to use them, why you would use one, and three different methods of predictably making the bite records used to mount the models
- To determine if occlusal equilibration is necessary, and how to perform one predictably and efficiently, including how to discuss it with your patients
- What to do with the occlusion of patients with excess overjet, anterior open bites, deep overbites, or Class III relationships who won't do orthodontics
- How to perform bite records in restorative patients for simple posterior restorations to full arches, to full mouths, simply and predictably

## Frank M. Spear, D.D.S., M.S.D.

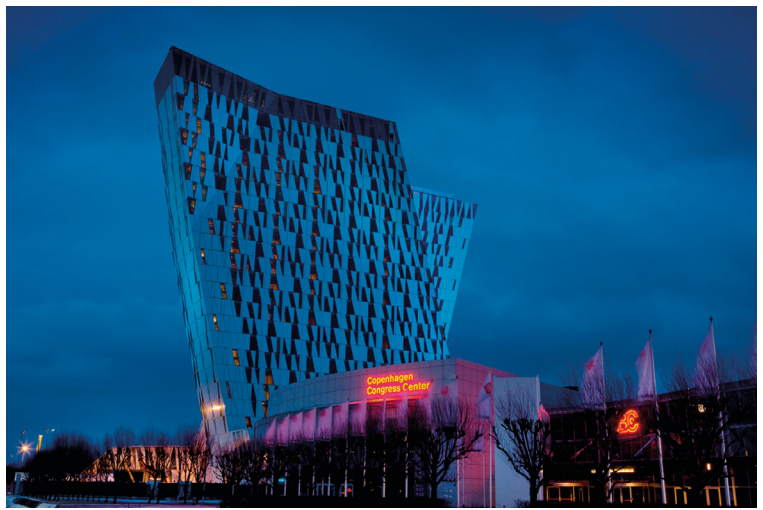

As the founder and director of Spear Education, Dr. Spear continues to be recognized as one of the premier educators in esthetic and restorative dentistry in the world today. Dr. Spear earned his dental degree from the University of Washington in 1979, and an MSD in periodontal prosthodontics in 1982, also from the University of Washington. Dr. Spear is an Affiliate Professor in the graduate prosthodontics program at the University of Washington. He and long time practice partner Dr. Gregory Kinzer maintain a private practice in Seattle limited to esthetics and fixed prosthodontics.

Dr. Spear has been recognized by numerous associations for his contributions to dentistry. In 1993, he was awarded the Christensen Award for Excellence in Restorative Education from the Chicago Dental Society. In 1995, the American Academy

of Cosmetic Dentistry presented him with a special award for having advanced the Art and Science of cosmetic dentistry in the United States. In 1996, he received the Saul Schluger Memorial Award for Excellence in Diagnosis and Treatment Planning from the Seattle Study Club. He and colleague Vincent G. Kokich were awarded the first ever Presidents Award for excellence in education from the American Academy of Esthetic Dentistry. He also earned the 2004 Distinguished Alumnus Award from Pacific Lutheran University his undergraduate Alma Mater. And in 2013 was named Distinguished Alumnus for the University of Washington School of Dentistry.

He belongs to multiple dental organizations including the American Academy of Esthetic Dentistry, American Academy of Restorative Dentistry, and the American College of Prosthodontics.

## Praktisk information

**OBS!** Eventuel hotelovernatning er ikke inkluderet i prisen. Dette skal aftales og afregnes direkte med de respektive hoteller.

Vi anbefaler, at booke overnatning gennem selve hotellet, da booking gennem andre udbydere end selve hotellet, kan resultere i at pengene går tabt ved eventuel aflysning af seminaret.

Plandent dækker ikke dette mulige tab.
